FEATURING

U.S. Representative Edward Markey (D-MA)

— * —

Mohamed T. El-Ashry

REN21 Committee Chairman

— * —

Alexander Ochs

Worldwatch's Director of Climate and Energy

About the Global Status Report: *The Renewables 2011 Global Status Report* provides an integrated perspective on the global renewable energy situation. Since the first Global Status Report was produced in 2005, the analysis has become the most frequently referenced report on renewable energy business and policy, serving a wide range of audiences from investors and government decision makers to students, project developers, researchers, and industrial manufacturers. It provides testimony of the undeterred growth of electricity, heat, and fuel production capacities from renewable energy sources, including solar PV, wind power, solar hot water/heating, biofuels, hydropower, and geothermal.

About REN21: REN21 is a global policy network in which ideas are shared and action is encouraged to promote renewable energy. REN21 provides a forum for leadership and exchange in international policy processes. It bolsters appropriate policies that increase the wise use of renewable energies in developing and industrialized economies. Open to a wide variety of dedicated stakeholders, REN21 connects governments, international institutions, non-governmental organizations, industry associations, and other partnerships and initiatives.
