
*100% Renewable Energy for All:
Solutions for combating climate change
3 December, 15:00 – 16:30, Blue Zone, Room 4*

Activities around the world show that renewable energy (RE) is a central pillar in climate mitigation. Learning from pioneers, this side event presents drivers, barriers and facilitating factors for achieving 100% RE, offering insights on how this transition is possible and affordable for all.

Join us for an interactive discussion on the following questions with voices from Cape Verde, Bangladesh, Germany, Sweden and many more:

- Who's the first country to reach 100% renewable energy?
- How to run factories with 100% renewable energy?
- What happens to jobs in a move to 100% renewable energy?
- What would it take to reach 100% renewable energy globally?
- Is 100% renewable energy viable for all energy uses?

15.00	Welcome, opening and introduction of speakers by moderator
15.05	Renewable Energy is Winning the Game: Global trends and figures <i>Laura Williamson, REN 21.</i>
15.15	100% RE for all: The needed system change <i>Kaisa Kosonen, Greenpeace International</i>
15.25	100% RE: A global movement is underway <i>Anna Leidreiter, World Future Council</i>
15.35	Facilitated discussion starting with 3-5 interventions from the floor
16.30	End
