Finance for the Energy Revolution

Day: September 11th 2017

Time: 17.00 – 18.30

Room: OLMECA

Description:

According to the IEA, total cumulative spending on renewable energy and energy efficiency during the next 15 years, must reach USD 13.5 trillion in order to meet NDC targets. However, to stay below an atmospheric greenhouse gas (GHG) concentration of 450 parts per million, the IEA also presents a more aggressive scenario with an additional USD 3.3 trillion in new investment required by 2030. The purpose of the event is to explore innovative and green financial mechanisms for renewable energy projects addressing the most relevant barriers to finance faced by project developers such as investment risks and project structuring.

Detailed Programme:

Innovative and green finance mechanisms for renewable energy projects.
Barriers for finance and how to address them.
Structuring successful energy projects for the financial sector.

Speakers:

- Daniel Chacón - Iniciativa Climática de México
- Antonio Castaño - BBVA
- Luis Fernando Gutierrez – MEXICO2

Organisers:

British Embassy
Mexico City
