Renewable Energy for Industries – Novel Opportunities

Day: September 11th 2017

Time: 17.00 – 18.30

Room: MAYA

Description:

During this side-event, the IEA Renewable Energy Division will report on on-going work identifying current practices and future technology and policy options to increase the uptake of renewable power and heat, as well as feedstocks and process agents, by various industries, including extractive and energy-intensive material industries. Guest speakers will report on practical experiences, barriers encountered, lessons learned and projects for further decarbonisation of industry based on renewable energies.

Detailed Programme:

- Context, Challenges, Technology and Policy Options (Cédric Philibert, IEA)
- Miraah, the World's Largest Solar Thermal Plant, in Oman's Oil Fields (John O'Dell, VP Business Development, Glasspoint)
- Greening the Industries: Engie's Perspectives (Georgina Grenon, ENGIE)
- Mission Innovation and Industry: Mexican Perspectives (SENER)

Speakers:

Moderator: Paolo Frankl, Head of Renewable Energy Division at the IEA

Panellists:

- Cédric Philibert, Senior Analyst, Renewable Energy Division, IEA
- John O'Dell, VP Business Development, Glasspoint.
- Georgina Grenon, Director 100%RE Solutions, ENGIE
- Speaker tbc, SENER
