

CALL FOR PROPOSALS

Data Advisor for the Renewables 2021 Global Status Report and the Renewables 2022 Global Status Report

Background

REN21 is the only global renewable energy community of actors from science, governments, NGOs and industry. We provide up-to-date facts, figures and peer-reviewed analysis of global developments in technology, policies and markets to decision-makers. Our goal: encourage and enable them to shift to renewable energy happen - now.

First released in 2005, REN21's Renewables Global Status Report (GSR) provides a comprehensive and timely overview of renewable energy market, industry, investment and policy developments worldwide. It enables policymakers, industry, investors and civil society to make informed decisions. The Renewables Global Status Report relies on up-to-date renewable energy data provided by an international network of more than 900 contributors, researchers, and authors. It has become the most-referenced document on renewables worldwide. (For the latest edition of the GSR, see www.ren21.net/gsr.)

The **Renewables Global Status Report** is conceived as a summary report with a more or less similar chapter structure as its predecessors, and content and presentation comparable to the previous year's report. The content for GSR 2021 will be based primarily on data from 2020 (or, if unavailable, the newest accessible data), and similarly with subsequent year's data for GSR 2022.

In addition, the report will have an executive summary and supplementary sidebars, tables and notes. Also, there will be a separate document that contains a summary for policy makers based on highlights of the report.

Objective

REN21 is looking for a consultant(s) to act as data advisor for GSR 2021 and GSR 2022¹, and who will work in close consultation with the REN21 Research Direction Team and GSR Special Advisors.

¹ Contract may be renewed for the second year dependent upon performance review following the first year.

Description of Required Tasks

- Review and provide suggestions for improvement on certain (5-10) key GSR figures.
- Review and provide statistical advice on proposed, new figures. 3 to 5 figures are anticipated for this task.
- Participate in discussions with the REN21 Research Direction Team on
 - general use of institutional and large datasets, particularly related to the heating and cooling sector,
 - use of assumptions within the datasets to facilitate improved or expanded contributions,
 - and, optionally, presentation of data in the figures themselves.

Qualification requirements of contractor

- Proven track record of knowledge about the renewable energy sector, in particular topics relevant to the chapter/section
- Related work experience
- Proficiency in English
- Openness to the collaborative nature of the project

Proposal Requirements

The submission should include:

- The contractor's specific interest in the project
- A detailed résumé, highlighting related work experience
- An overview of written reports covering similar scope and focus
- The contractor's daily rate

Proposals should be addressed to secretariat@ren21.net.

The **deadline date** for receipt of proposals is **28 September 2020, 23:00 (CEST)**.

GSR Tentative Timeline

September-December	Round 1 Data Collection & Authoring <ul style="list-style-type: none"> - Policy Landscape - Distributed Renewable Energy for Energy Access - Enabling Technologies & Systems Integration - Energy Efficiency - Feature - Round 1 sidebars
Early/mid-January	Round 1 Peer Review

January-early May	Round 2 Data Collection & Authoring <ul style="list-style-type: none">- Global Overview- Market and Industry Trends (technology sections)- Investment Flows- Round 2 sidebars
End March/early April	Round 2 Peer Review
Early June	Launch of Final Report
